

2019 Meeting

International Society for the Advancement of Clinical MEG

Dear Sponsors,

On behalf of the Local Organizing Committee, executive committee and the International Society for the Advancement of Clinical MEG (ISACM), it is our pleasure to invite you to join us for the 2019 ISACM meeting starting the evening of September 11 until noon on September 14, 2019 at the Peter Gilgan Centre for Research and Learning in Toronto, Canada.

The program titled “Epilepsy and Beyond: The advantages of MEG for epilepsy and other clinical applications” will:

- describe the well-established use of MEG for the study of epilepsy by offering educational sessions focused on teaching best practices for conducting and interpreting epilepsy studies.
- offer sessions that explore novel applications of MEG to different clinical conditions.
- expand the vision of how MEG can be used by highlighting the scope of recent and exciting MEG advancements.

We hope you will join our educational symposium, which will feature experts in the field of epilepsy, neurology and cognitive neuroscience, and its promising target audience of Physicians (epileptologists, neurologists, neuroradiologists, neurosurgeons), neurophysiologists & neurodiagnostic/MEG technologists, MEG researchers, medical students, graduate and post-doctoral research trainees.

As exhibitor space is limited and priority is given to those who commit early, we encourage all interested to contact us.

Hiroshi Otsubo MD

Associate Professor, Department of Paediatrics, University of Toronto
 Director, Neurophysiology Lab
 Neurology, The Hospital for Sick Children

Elizabeth Pang PhD

Neurophysiologist, Director of Evoked Potentials & MEG functional mapping, Division of Neurology
 Senior Associate Scientist, Programme in Neurosciences & Mental Health, Sick Kids Research Institute

Cheques can be made payable to *University of Toronto*.
